

Workato Enterprise MCP

95% of GenAI projects fail. Join the 5% that don't.

C O N N E C T · A C T · G O V E R N

Workato Enterprise MCP closes the Enterprise Control Gap, the difference between AI accessing your systems and AI acting safely within them. Built on open standards with enterprise-grade governance, Workato Enterprise MCP provides the orchestration layer that gives AI agents context to act with trust and accuracy. Transform APIs, Genies, Recipes, and more into secure, governed Enterprise Skills any agent can execute across your tech stack.

Enterprise Skills & Orchestration

Transform existing APIs, Genies, Recipes, and workflows into Enterprise Skills any agent can call via MCP. Whether you're connecting Salesforce, NetSuite, or custom apps, Workato replaces raw API calls with proven business processes, complete with logic, approvals, and error handling.

AI-Ready Services

Convert Workato Recipes into AI-callable Enterprise Skills that any agent can invoke. Genies enable agent-to-agent collaboration, coordinating complex workflows across your enterprise with governed access.

Limitless Integration

Support any MCP-compatible AI framework (Claude, Cursor, Windsurf, etc.) without custom integrations. Workato's pre-built MCP servers use our 1,200+ enterprise connectors to connect to your systems in minutes with governance and security built in.

Action-Oriented Intelligence

Go beyond insights with Enterprise Skills: trusted actions that execute consistently every time. Replace improvised API calls with proven workflows that include logic, approvals, and error handling. Securely embed AI with governed access and full observability.

Enterprise-Grade Security and Governance

Scale AI usage safely with enterprise-grade security: verified user access, role-based permissions, automatic PII obfuscation, and full audit trails. Built-in SOC2, PCI, and ISO compliance, Workato Enterprise MCP delivers enterprise security, governance, and regulatory standards by design.

Cloud-Native and DevOps-Free

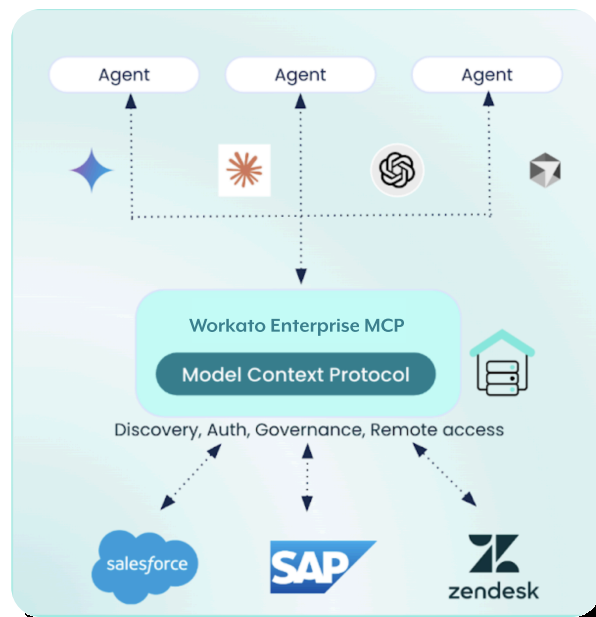

Get started in minutes with cloud-native, serverless infrastructure. Workato handles identity, access, hosting, and environment management, giving teams a no-code path to AI agents. Focus on building Enterprise Skills and deploying agents, not maintaining integration runtimes.

Workato Enterprise MCP

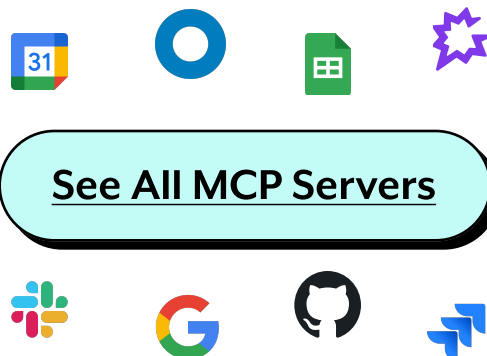

Securely Connect AI to Enterprise-Ready Capabilities

Workato Enterprise MCP is the platform that makes agents work, giving any AI the context, continuity, and control to act inside your enterprise systems with trust and precision.

Production-ready MCP servers that connect to enterprise systems in minutes

Instantly deploy or custom build. Every server includes enterprise security and governance. Get your agent live in minutes and skip months of building infrastructure.
